Sequence 19, Application US/10066130

Sequence 19, Application US/10066130

Sequence 19, Application US/10066130

Patent No. 6693657

PAPLICANTION: In Vitro System for Replication of RNA-Dependent RNA Polymerase (FITLE OF INVENTION: Vitroses

FILE REPERENCE: PH-7171 NP

CURRENT APPLICATION NUMBER: US/10/066,130

CURRENT FILING DATE: 2002-01-31

PRIOR APPLICATION NUMBER: US 60/265,437

PRIOR FILING DATE: 2001-01-31

NUMBER OF SEQ ID NOS: 20

SOCTWARE: PatentIn version 3.1

SEQ ID NO 19

LENGTH: 2674

TYPE: DNA

ORGANISM: viral

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 20, Application US/10066130

Patent No. 6699657

GENERAL INFORMATION:
APPLICANT: Bristcol-Myers Squibb Company
ITILE OF INVENTION: In vitro System for Replication of RNA-Dependent RNA Polymerase
ITILE OF INVENTION: Viruses
FILE REFERENCE: PH-711 NP
CURRENT APPLICATION NUMBER: US/10/066,130
CURRENT FILING DATE: 2002-01-31
PRIOR APPLICATION UNMBER: US 60/265,437
PRIOR FILING DATE: 2001-01-31
PRIOR FILING DATE: 2001-01-31
NUMBER: OF SEQ ID NOS: 20
SOPTWARE: Patentin version 3.1

SEQ ID NO 20
LENGTH: 2327
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Query Match

Sequence 1, Application US/09577424

Patent No. 6525245

GENERAL INFORMATION:

APPLICANT: Rhoads, David M

TITLE OF INVENTION: METHOD FOR IDENTIFYING COMPONENTS INVOLVED IN SIGNAL

TITLE OF INVENTION: TRANSDUCTION PATHWAYS IN HIGHER PLANTS

FILE REFERENCE: UNL2990

CURRENT APPLICATION NUMBER: US/09/577,424

CURRENT FILING DATE: 2000-05-22

NUMBER OF SEQ ID NOS: 6

SOFTWARE: Patentin Ver. 2.1

ELNCTH: 12614

TYPE: DNA

ORGANISM: Bacterial Plasmid DNA - Plasmid pZP-ALE

FEATURE:

NAME/KEY: CDS

LOCATION: (1665)..(3317)

US-09-577-424-1
                                                                                                                                                                                                                                  Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        음 성

Patent No. 6716601
GENERAL INFORMATION:
APPLICANT: Belfield, Graham
APPLICANT: Belfield, Graham
APPLICANT: Oakley, Caroline
TITLE OF INVENTION: Compositions and Methods
TITLE OF INVENTION: Controlling Nucleic Aci.
FILE REFERENCE: 3526.8543
CURRENT APPLICATION NUMBER: US/09/743,194
CURRENT FILING DATE: 2001-01-08
NUMBER OF SEQ ID NOS: 32
SOFTWARE: Patentin Ver. 2.0
SEQ ID NO 20
LENGTH: 13073
TYPE: DNA
ORGANISM: Saccharomyces cerevisiae
